Subject: Application for Full Stack Developer Intern Position at Microsoft

Dear Hiring Manager,

I am excited to apply for the Full Stack Developer Intern position at Microsoft. As a passionate full-stack developer with a strong foundation in Java, object-oriented programming, Spring Boot, and microservices architecture, I am eager to bring my problem-solving skills and expertise in building scalable applications to your esteemed team.

With a deep understanding of core Java, multithreading, and object-oriented programming, I have built and optimized backend services that efficiently handle large-scale data processing. My experience includes working with Spring Boot, Hibernate, RESTful APIs, and cloud technologies to develop secure, robust applications. Additionally, my knowledge of SQL, MongoDB, and Kafka enables me to design efficient and scalable data solutions.

Recently, I developed a high-performance trading simulation platform using Java and Spring Boot, optimizing real-time data processing with low-latency techniques. I also worked on an e-commerce application using React, Node.js, and MongoDB, demonstrating my ability to build full-stack applications.

I am particularly excited about Microsoft's commitment to technology-driven innovation and its impact on global computing. I am eager to contribute to such projects and further enhance my expertise in software development.

I would welcome the opportunity to discuss how my skills align with Microsoft's needs. Thank you for your time and consideration—I look forward to the possibility of contributing to your team.

Best regards,

Rohit Mishra
